Surgery

Veterinary Surgical Centers (VSC) is a progressive veterinary referral practice working in multiple locations serving all of Northern Virginia, Maryland and the District of Columbia. VSC provides a wide variety of services, including: orthopedic, soft tissue, minimally invasive, neurological and rehabilitation. VSC consists of board-certified specialists, residents and interns, and certified rehabilitation practitioners along with a highly trained and compassionate staff.

Customized to Fit Your Pet

To ensure your pet receives the correct treatment necessary for his or her wellbeing, VSC requires a referral from your primary veterinarian. Once your veterinarian has contacted us to discuss your pet's needs, we are then able to schedule a consultation with you. VSC works closely with your veterinarian by providing continual updates and access to records while your pet is in our care.

By partnering with local emergency referral hospitals, you and your pet can enjoy the benefit of around the clock care, seven days a week. This guarantees peace of mind for you knowing that you can call any time and request an update. We understand how difficult it is to leave your pet, but rest assured we are dedicated to keeping you well informed and up-to-date on any changes. With VSC, both you and your primary veterinarian are considered part of the team.

VSC's number one priority is to provide your pet with the highest quality of surgical treatment as well as supportive pre and post-treatment care. As both veterinary professionals and dedicated pet owners, progressive technical expertise and compassion are the hallmarks of our practice. Our patients happiness and health remain at the center of all that we do.

What We Do

VSC brings the best care to those around us. We provide a standard of care for our patients that is unsurpassed elsewhere.

Why Choose VSC

- We have more board-certified surgeons on staff than any referral practice in Northern Virginia.
- Your pet receives 24-hour care 7 days a week.
- State-of-the-art facilities and equipment are available to perform surgeries such as total hip replacements and arthroscopies.
- We utilize the most advanced diagnostic imaging available, to include MRI, CT Scan, and fluoroscopy.
- We have made physical rehabilitation available as part of our standard of care, ensuring that we are there for our clients and patients during the entire recovery process.

What is Board Certified?

A board certified doctor is a veterinarian who has undergone an additional 4-5 years of training in the area of their specialty after receiving his or her initial veterinary degree. A veterinarian who meets the rigorous education and training standards submits their credentials application and passes a specialty examination. They are then awarded a diploma and are referred to as a diplomate of veterinary surgery. These veterinarians have earned the right to be called a specialist in the field and complement the general veterinary practitioners with surgical solutions that demand specialized expertise and equipment.
